

R&D Engineer

Company

The company is a manufacturer of medical devices with a factory located in Bangkok.

They are recruiting for an **R&D Engineer** based in Bangkok in the largest manufacturing site of the group.

Responsibilities

As a part of the group R&D community and reporting to the R&D Manager Asia, R&D engineers are supporting the growth of the company by designing new medical devices, processes and equipment in line with the strategy and needs of the group. The engineer will have the responsibility of

- Turning customer's requirements into success criteria and final product specifications.
- Designing product prototypes bearing in mind scale up and industrialisation constraints.
- Developing and validating the processes needed for the manufacture of the products.
- Participating to the development of new equipment with internal and external resources.
- Writing of technical documentation (validation protocols, trials reports, etc...)
- Participation in risk management activities

Although a fair level of autonomy is expected from the successful candidate, R&D engineers interact frequently within the R&D department (France and Asia) as well as across departments to use their knowledge, competence and skills for the successful delivery of the projects to the market.

Profile

- Engineer in a relevant scientific area (e.g. mechanical, microbiology, chemistry...), with preferably 3 years of successful experience in the cosmetic, pharma or medical device industry
- Diligent, meticulous, attention to the details whilst keeping an eye on the big picture are key to be successful in the role
- Good command of English, both written and spoken is mandatory.
- Some knowledge of the EU and US regulations related to the development of Medical Devices and its documentation (ISO 13485, Risk Management, Design Control, Traceability...) is a plus
- Familiar with MS Office. Some knowledge on statistical software (e.g. Minitab) would be a plus
- Good team player and coordinator, able to work efficiently with tight deadline
- Highly responsible, dependable, with good sense of ethic
- Willingness and ability to learn fast

Conditions

- Work Location: Bangkok
- Local Contract
