

Draftsman – Mechanical Engineer

Company

Established in Thailand since 2002, the company develops packaging machines and equipment used in food and beverage, pet food, home care, personal care and chemical industries

It focuses on the following activities:

- development and manufacture of fill and seal or fill and cap machines for stand-up pouches and related equipment,
- development and manufacture of semi-automatic and automatic filling and dosing systems,
- development and manufacture of ancillary equipment for bottle filling and capping lines mostly supplied to machine manufacturers but also to end users,
- subcontract manufacturing of packaging machines, sub assemblies and parts.

With a marketing strategy targeting initially the Asia-Pacific market, the company has increased its sales exponentially and now exports around 80% of its production worldwide to companies ranging from multi-national to SME's.
