Having already participated to BI projects, involving data design, solution implementation and reports development, the candidate should have a strong analytical mind and project management methodology.

Key Responsibilities

- Convert business requirements into a system solution using key analytical skills.
- Organize the team and participate to the implementation of the BI systems.
- Standardize and Streamline BI process and solutions.
- Documentation of source-to-target mappings, data dictionaries, and database design.
- Fully involved into Business Intelligence projects in an international context (bank's subsidiaries across the world – France, Asia, Pacific, Africa).

Required Education & Experience

- Fluent in French is mandatory
- Good level in English (writing and speaking).

Required competencies

- Project methodology
- Skills in Data modeling and BI architecture.
- Skills in PL/SQL and Reporting solutions and extraction processes.
- Good knowledge and understanding of the key Financial & Banking concepts.

Extra appreciated competencies

- Experience in the banking Industry
- Be familiar with Data mining concepts.
- Work with Big Data technologies (Hadoop)
- Experience with Datastage
- Experience with Microstrategy
