Core Banking Business Analyst

Company

The company is a wholly owned subsidiary of a French bank, established in Thailand since 2008 to become an IT hub and deliver IT operations and support for Group in South East Asia and Pacific Ocean areas. Today, it supports a Bank in Laos, one in Cambodia, one in Vanuatu one in Solomon Islands, one in Fiji, and one in Djibouti (Africa).

The company provides end to end Infrastructure and Applications management around Core Banking, Internet Banking and E-Payments.

It has also operated an offshore development center (specialized in Cobol & Java) for Paris headquarters since 2011.

They are a unique company, thanks to their identity and their history: They place their expertise at the service of the Group and develop their activities with an entrepreneurial structure. By putting the group best interests first, it allows them to deliver tailor-made solutions with high value-added.

Mission

We are looking for a Business Analyst, with both functional and technical background of Banking industry (Core Banking, Risks and Compliance) and Project Management skills. Motivated candidate must be able to gather requirements, write specifications, lead implementation and deployments, have a strong analytical mind and be an excellent communicator. In this role, Business Analyst will be in a position to lead end-to-end IT strategic projects for International Banks.

Responsibilities

- Analyze Business requirements from the banks and design functional specifications.

- Participate to the implementation and testing activities.

- Prepare user guides and train Banks' end users.

- Lead project implementation and operational support.

- Coordinate Project Management and related governance (project and steering committees, reporting).

Profile

- Bachelors or Masters / University degree in related field or equivalent work experience required.
- Minimum of 3 years' experience working within the Retail, SME or Corporate banking domains is required. Ideally this should be in an international context with exposure to a number of geographical and cultural regions.
- Some functional Bank Knowledge in Core Banking (for instance Accounting, Letters Of Credit, Loans and Deposits, Foreign Exchange, Money Market, Bills and Collections, Fund Transfer, Payments and Collections, Securities, Data Entry, Accounts …), Risks and Compliance.
- Experience in end-to end implementation of Core Banking projects.
- Knowledge in the functional workflows of the Core Banking products.

- Experience with Flexcube Core Banking system (Oracle) is a plus.
- **Fluent English**, French is a plus.

Technical Skills Required

- Technical knowledge in SQL, PL/SQL

Conditions

- Position type : Full time
- Place of work : Bangkok, Sathorn district
- Salary : Negotiable
- Working conditions: office environment.
