

PROJECT QUALITY SENIOR ENGINEER

Company

SAWHA, joint venture of SNC and Groupe-Atlantic, is specialized in the design and production of electric water heaters and today has 80 employees and numerous development projects.

Our Rayong site in Thailand is looking for a project quality senior engineer (M/F)

Mission

Quality expert in product development, you will participate in improving the quality of products / projects / processes. Reporting to the head of the site's Research and Development department, you assure the safety, reliability and product quality of in development products and modifications & variants.

In this context:

- Perform risk and critical cause analysis (Risk analysis, FMEA, fault tree, etc.);
- Define & follow-up product validation plans and check the consistency of the results in relation to the risks;
- Guarantee the treatment of Product / Process risks and critical cause analysis in the project & SOP phases;
- Capitalize the analyses for future projects for a virtuous circle;
- Assure that the objectives and milestones of the safety & quality are validated

Profile

Our ideal applicant might gather some of the following characteristics:

- Engineer with a successful experience in project quality or product development. Knowledge of the medium and large series environment is valuable. You master the risk analysis tools, FMEA and have knowledge of test facilities.
- Fluent in English. Knowledge of Thai and/or French is an asset.
- Rigorous and well organized
- Excellent interpersonal skills and good contact with the field, you are constantly working with teams and customers

Conditions

- Salary according to experience.
