

# QA Senior Automation Test Engineer

## Company

BRED IT (Thailand) Ltd. is a wholly owned subsidiary of the French bank BRED Banque Populaire based out of Paris.

BRED IT was established in 2008 to become an IT hub and deliver IT operations and support for BRED Group Commercial Banks in South East Asia and Pacific Ocean areas.

Today, it supports Banque Franco Lao in Laos, BRED Bank Cambodia, BRED Bank Vanuatu, BRED Bank Solomon Islands, BRED Bank Fiji and Banque pour le commerce et l'industrie – Mer Rouge (BCIMR) in Djibouti (Africa).

BRED IT provides end to end Infrastructure and Applications management around Core Banking, Internet Banking and E-Payments.

BRED IT has also operated an offshore development center (specialized in Cobol & Java) for Paris headquarters since 2011.

We are a unique company, thanks to our identity and our history: We place our expertise at the service of BRED Group and develop our activities with an entrepreneurial structure. By putting BRED group best interests first, it allows us to deliver tailor-made solutions with high value-added.

## Main Objectives and Activities

- Define and implement an Automation testing framework (common reusable method library, data creation methods, utilities ...) considering multiple factors such as cost of development and maintenance effort, technology currently used at Bred or compatibility with internal Bred tools.
- Become the reference and the leader for Automation testing at Bred IT and provide technical direction to maintain an innovative test automation framework and solution.
- Develop test automation scripts and execution of those scripts, to help increase quality in Bred deliverables the team the fastest feedback for any changes in the products/services.
- Understand the business requirements, user flows, and system architecture to be able to design how to automate the test in API and end-end levels.
- Maintenance and Enhancement on the Test Automation Framework for continuous utilization of Automation testing by Bred.
- Integrate automation testing with Bred development pipeline (Jenkins, GIT).
- Define automated test criteria, and develop automated tests for all functionality that meets specified automation criteria
- Optimize and fasten the automatic test execution time and define the proper test suite for each stage of development pipeline
